VEHICLE UPDATE

For those who didn't see our September email update - WE BOUGHT A VAN! Praise the Lord for His timing and provision.

Just recently, a neighbor's friend christened our parked van with her bumper - guess it's a true Nairobi vehicle now!

HANGAR ROLES

Phil has been learning how to do internal quality audits within the maintenance department at AIM AIR. His official title is Deputy Quality Manager.

EJ has the role of Housing Point Person for Ngumo Central estate (ours!). She hires folks to clean empty houses, handles questions, helps new folks, etc.

She's also serving as the missionary liaison for the ABS Christmas work party, which includes 90 national staff and missionaries plus spouses. (ABS includes all of AIM's support service ministries, like AIM AIR).

Blohm Flying News: Phil, EJ and sons

November 2016

Our 14th year of homeschooling started in September!

Andrew is 12th grade, Benji is 11th, Michael is 10th, and Matthew is 3rd.

We enjoy a weekly home-school co-op, where Benji is able to assist coaching one of the younger classes for PE. Pray with us for our older sons as they think about the future, potential colleges, and what God wants them to do.

Bibles. Something we take for granted. Yet the airport guards seem intrigued, and yet another has asked Phil for one. Pray for these guards - that they will read their Bible and understand its truth!

Continue to pray for relationships within our neighborhood, and also within our mission community.

We've started attending Good Shepherd Church recently (English speaking, but not too many foreigners!); pray for new friends and ways to get involved.

ONLINE ADDITIONS!

EJ recently had an article of our journey into missions published in the Tompkinsville News, the newspaper in our Kentucky "hometown."

The story is on our blogsite, along with a video update. Check it out! ☺

www.blohmsinafrica.aimsites.org

We rejoice every time we think of you!

Thank you for praying and giving to our ministry.

A perk of Phil's new role is that he and two of the boys were able to fly to our out of Nairobi air bases last month. It was especially meaningful for Phil to see the runways and terrain of the areas our planes fly in and out of.
